

ATTACHMENT (C) to OPEN LETTER to the Residents and Citizens of Scituate, Massachusetts

16 September 2012

Information provided herein is in greater part documented on the www.accesstothecourts.org website.

Introduction

The Access To The Courts website was mysteriously expunged and all files destroyed in August 2008, just weeks before the Town of Scituate police officer Michael O'Hara perjured himself, as the lone prosecution witness in a Disorderly Conduct trial against Jeffrey L. Clemens – the featured victim of prejudice since the website was created on June 11, 2005. Much of that prejudice was carried out in Los Angeles by federal agency folks with ties to security and threat management firm Gavin Debecker & Associates, a civil defendant of Jeffrey L. Clemens, armed with ammunition from Scituate Police in the form of a falsified O'Hara Report and mutual coordination of the delay of trials for false state charges.

The LA Lies

Unresolved issues, further past criminal acts on the part of public servants, and the current incarceration of Jeffrey L. Clemens in a federal prison does not allow full disclosure of the horrific prosecution – aided by the Scituate Police Department – in Los Angeles from May 2005 through 2007. The prosecution by associates of Gavin Debecker & Associates – a civil defendant of Jeffrey L. Clemens – stands as one of the most malicious...because 1) there was no crime on the face in anything Clemens ever said or did, especially in his writings, one of which was prompted by the false arrest on May 12, 2005 (for alleged threats), 2) parties tied to the prosecutors (US Attorneys) stood to gain, and 3) intentional violations of law, rights, and rules pervaded the proceedings. The matter is directly tied to The Scituate Scandal and The Hingham Horror [Attachments A and B] and to The Boston Brainwash [Attachment D]. Assigned public defenders – and there were a number in succession – played a handling role, well documented on the Access To The Courts website over the years. The handling amounted to a cover up, including FBI false (intentional and prejudicial) statements in complaints to the court.

A false arrest mandate was included in a complaint drafted by FBI special agent Ingerd Sotelo...the agent claimed that Jeffrey Clemens was told that if he wrote another (threatening) letter to a judge, he would be arrested. The FBI report documenting an FBI visit to Jeffrey in April 2005 contradicts that mandate and contains no such mandate. Why? Because Jeffrey never threatened anybody and never said he would harm anybody, period, AND he was in his rights to write letters to judges or anybody. But, Gavin Debecker, and their resources in assessing threats, had other ideas in mind for exploiting protected speech and turning it into incarceration, wherein civil plaintiffs get literally shut down and problems solved for civil defendants like Gavin Debecker, CAA, MGM, or others caught in provable misconduct.

Upon the very first time that Jeffrey L. Clemens ever appeared in a federal criminal court, in Toledo, Ohio on May 26, 2005, US Attorneys cited (in open court) information received from the **Secret Service** that indicated that Jeffrey was facing criminal charges in Massachusetts. Scituate Police had made their mark with the federal agencies aligned with Gavin Debecker, who is widely known for helping US Marshals assess threats against judges. Jeffrey later sued the Secret Service agent for violating his rights and such, but the court gave immunity to the Secret Service agent, because of a sworn affidavit that showed up saying that the agent was performing his duties, thus is immune from suit. Hmm.

What did Jeffrey ever do to subject him to investigation or whatever from a Secret Service agent (Ralph Sozio), who just so happened to have an office in Yankee Stadium, where the 911 caller's father – Jerry Laveroni - works security...? It is really an unfortunate coincidence? When Jeffrey was repeatedly assaulted by US Marshals on January 13, 2012 in US District Court in Boston, the second of which behind court walls, a Marshal said to Jeffrey "George W. Bush", the name of a past president and subject to secret service protection. The assault occurred in The Boston Brainwash proceedings begun in March 2010 to protect the Town of Scituate and a surrounding band of public servants. [See Attachment D]

What one may not remember or know about May 2005 is that 1) family of a judge from Chicago were killed earlier in 2005 by a disgruntled contractor mired in legal proceedings, thus putting US Marshals on alert, and 2) threats were sent to all US Supreme Court justices and the Bush Cabinet secretaries in mid April 2005 (in letters from New England addresses), again putting US Marshals and US Secret Service on alert. When FBI and US Marshals visited Jeffrey on April 18, 2005, the very first question from the FBI agent was what Jeffrey thought of the judge family killing in Chicago! Jeffrey knew nothing about it, especially since he was a busy graduate student in Amherst, MA without a TV.

It is not unreasonable or delusional to believe that Jeffrey was secretly treated as a suspect in threats (originating in mid April 2005) to the president's staff, thus subjecting him to open-ended detention and undue prejudice, handy when extorting guilty pleas from detained people. To add proof to this notion, the FBI invoked arrest and US Marshal documented arrest of May 25, 2005 was codified in the FBI arrest database as an arrest for threatening the president and/or protectorates.... WELCOME to the world of unified information sharing police, in every nook and cranny of government. Welcome civil rights violations! Imagine a low level civil servant working jobs like probation officer or traffic cop reading about this Jeffrey guy threatening the president...get your guns out, NOW! Shoot first, questions later!

Further information may be obtained by request and under strict confidence. Some background is in order on what O'Hara called the Hollywood Matter in his Report of May 12, 2005...

Gavin Debecker & Associates is a security and threat management firm having professional association with the FBI, US Marshals, and the US Secret Service. Gavin Debecker & Associates (GDB) had employees stationed in-house with Creative Artist Agency of Beverly Hills, CA as of September 1997. That is the month Jeffrey L. Clemens met a misguided GDB employee at CAA – William Michaelis citizen arrested Mr. Clemens, upon a physical throw down in a public lobby, for merely asking to see an employee of CAA (with whom he had communicated for years), on the pretext of trespassing.

What followed was a sinister cover up of the assault upon Mr. Clemens with Gavin Debecker & Associates bringing to bear its enormous resources and association with law enforcement to effect a criminal cover up. The litigation that followed spanned over five years. The fact is, the Beverly Hills police pursued a trespassing charge, the prosecutor failed to turn over the videotape of the assault/arrest in the lobby, and the court dismissed the case at the start of trial, thus, exonerating Mr. Clemens. Yet, Jeffrey is disallowed to prove his innocence in the trespassing, so prejudice was to take over big time. In fact, the FBI – a Gavin Debecker professional associate – failed to document the exoneration in the national criminal database. Such omission was to play a part in ongoing prejudice and false police allegations against Mr. Clemens in the years ahead, including by the MSP near Northampton, MA in early 2002. The MSP detective working that region at the time, and coincident with the region’s District Attorney office, is none other than John C. Gibbons, the appointed US Marshal at the time of the January 13, 2012 Marshal assaults on Jeffrey L. Clemens, crimes of which MAGO refuses to investigate!!! And, Gavin Debecker and their ilk were to lurk about for years to come, as well. After all, the brother of their liaison (Jeffrey W. Marquart) with the US Secret Service graduated from Harvard Law School in Boston.

Conclusion [The LA Lies]

Two Scituate police officers made serious mistakes of judgment on May 12, 2005. They jointly participated in a false arrest. Their senior officer, a Lt. John Rooney, decided to help cover up, by providing the false officer report to multiple federal agencies. After all, Mr. Clemens had disclosed to the Scituate Police the involvement of the FBI with his matters, as the O’Hara Report documented. US Attorneys used some of this information as a pretext for detaining Mr. Clemens, but they also possibly misused the information at a secret grand jury. Once the harm was done, and months of pre-trial incarceration passed, it was a simple matter to extort a plea agreement in exchange for freedom...freedom to defend against the Scituate charges? Hell, no, the US Probation Department refused to allow Mr. Clemens travel to Massachusetts to defend himself, not until the very end of 2007. That is why we see a trial for Disorderly Conduct, allegedly happening in 2005, being tried in 2008.

The root cause of police misconduct is judicial misconduct, with a lot of attorney misconduct in between. If the citizens of Scituate fail to make their police and attorneys accountable, then the courts will not get the message to end their own support of dishonesty and prejudice throughout the legal system. This will leave a legacy of disgrace for the town, a legacy of indifference to justice.
